METALWORKING FLUIDS

High-Tech Machine Tool Lubricants for Metalworking Industry

BIOSTABLE METAL WORKING FLUIDS

Strub Stabillo Cut 1	Newest Generation high-performance water-soluble metal working fluid, excellent machining performance in all applications, very good service life, suitable for both ferrous & nonferrous metals.
Strub Stabillo Cut IB50	High tech bio balanced water-soluble metal working fluid, suitable for all material grades and various machining application, excellent sump life and lower oil consumption.
Strub Stabillo Cut Super	Universal biocide free metal working fluid for lot of cutting operation such as milling, drilling, turning, grinding etc. for cutting of various metals with superb flushing properties.

BIOSTATIC METAL WORKING FLUIDS

Strub Stabillo Cut Extreme	Bio static metalworking fluid based upon nano technology possessing universal characteristics. Resistant to microorganisms & fungi. Non sticky and re-emulsifiable with water.
Strub Stabillo Cut Supreme M	One of the multi-metal products which meets all expectations of modern machining technology. High performance product for all machining operations, excellent flushing, and cleaning properties, suitable for high-speed machining.
Strub Stabillo Cut Ultra B	High performance metal working fluid suitable in various percentage with tap water and even low water hardness. Cost effective, high tech bio-stable universal multi-metal cutting fluid for various applications.

STRUB SPECIALITY PRODUCTS

Strub Vulcan Futura CF 05 (For carbide grinding - Neat type)	Chlorine free low viscosity neat cutting oil recommended for various grinding applications like form grinding, profile grinding, specially suitable for grinding of HSS & tungsten carbide with special anti cobalt-leaching properties.
Strub Stabillo Cut Slide 50 CO (Synthetic water soluble grinding fluid)	Incorporated with synthetic base oil, anti-rust additive, effective metal passivator. Product gives excellent cooling properties and cleaning effect. Suitable for tungsten carbide grinding on small open type grinding machines to CNC grinding machine. Has excellent Anti Cobalt leaching properties.
Strub Vulcan Futura CF 2000 Series (For punching/stamping/lapping)	Evaporative coolant for ferrous and non-ferrous metals. Ideally suited for stamping, punching, light forming, turning, drilling, milling, sawing, tapping, bending, and profiling of sheets. Suitable for steel, aluminum, Cr-Ni, copper alloys and zinc sheets.

INDUSTRIAL LUBRICANTS

High-Tech Products for Industrial Applications

NEAT CUTTING OILS

Strub Vulcan Futura CF 10,15,22,35
(For machining)

Chlorine and Zinc free high performance neat cutting oils based on mineral oil, synthetic components and modern effective additives. Recommended for normal to difficult machining operations on steel and cast iron, also performs well for deep hole drilling operation.

METAL CLEANERS

Strub Monafix Cleaner 1908

Industrial cleaner for cleaning of components. Has excellent rejection of mineral oil which guarantees the cleaning performance. Suitable for both ferrous and non ferrous materials.

Strub Monafix Cleaner 1921/1921B

Strub Monafix cleaner-1921 can be applied in diverse system, from simple wetting to high pressure spraying on machines. Suitable for cold as well as hot washing. Strub Monafix cleaner-1921 B is industrial cleaner which is compatible for nonferrous material i.e aluminium and its alloys, copper and brass. Product is suitable for soft metals with zero discoloration.

Strub Monafix Cleaner SOL

Industrial cleaner for cleaning of parts. Compatible with most ferrous and nonferrous metals. General purpose cleaner for various industrial cleaning applications.

HYDRAULIC OILS

Strub Vulcolube Series
(ISO VG 10,15,22,32,46,68,100,220,320)

High quality HLP hydraulic oil recommended for almost every kind of hydraulic system with excellent oxidation stability

Strub Vulcolube HLP
(ISO VG 10,15,22,32,46,68,100,220,320)

High Quality HLP hydraulic oil with excellent ageing, temperature and oxidation stability. On top of that it offers good wear, rust and corrosion protection. Best choice for plastic IMM. Preferred choice by many plastic injection moulding machine manufacturers like ENGEL and ARBURG

Strub Vulcolube EP VI
(ISO VG 10,15,22,32,46,68,100,220,320)

High Viscosity Index hydraulic oil with excellent viscosity temperature behavior, ageing control and oxidation stability. Excellent elastomer and multi metal compatibility. Recommended for all high-tech hydraulic system and plastic industry.

Strub Vulcolube HLP ZF
(ISO VG 10,15,22,32,46,68,100,220,320)

Zinc-free high quality oil based upon solvent-refined base oils with very good anti-wear properties, excellent load-bearing qualities and lubrication effect.

SLIDEWAY OILS

Strub Vulcoway +
(ISO 32,46,68,100,150,220)

Special demulsifying slideway oil of the highest quality for machine tools with vertical and horizontal slides. Excellent lubricity properties to avoid stick-slip motion of slides resulting in better accuracy of machine tools.

INDUSTRIAL GEAR OILS

Strub Vulcogear EP , XMP Series
(ISO VG 46,68,100,150,220,320,460,680,1000)

High-class gear oil with the highest load-bearing capacities offering excellent protection against wear. It offers excellent rust and corrosion protection, good thermal stability, an excellent protection against ageing and good wetting qualities. Compatible with all kinds of gaskets and seals.

GREASE

Strub Universal Grease 2/3
NLGI 2/3

Multipurpose grease for all industrial applications formulated to provide added protection against rusting and water washout

Strub Universal Grease 1900 EP 0/1/2/3
NLGI 0/1/2/3

STRUB Universal Grease 1900 EP is a high-quality lithium soap-based grease which is widely-used within industry and possesses excellent high-pressure and wear-reducing properties.

Strub Universal Grease LX 220
NLGI 2

Lithium complex grease for high temperature applications. Specially designed to reduce lubrication intervals compared to conventional lithium greases.

OTHER INDUSTRIAL GRADES

- > Engine Oil
- > Spindle Oil
- > Forming Oil
- > Turbine Oil
- > Honning Oil
- > Gear Oil
- > Circulating Oil
- > Rust Preventive Oil
- > Compressor Oil
- > Shuttering Oil
- > Stamping Oil
- > MQL
- > Vacuum Pump Oil
- > Drawing Oil
- and many more....
